PROFESSIONAL SUMMARY

Computer Engineering student at Thapathali Campus with hands-on experience designing user-centered digital products end-to-end, from wireframes to high-fidelity prototypes. Skilled in Figma, Adobe Illustrator, and Sketch, with a working knowledge of HTML, CSS, and JavaScript that lets me translate designs into functioning interfaces and collaborate closely with developers. Seeking to contribute as a UI/UX Intern.

EDUCATION

Thapathali Campus, Institute of Engineering 2022 – Present
Bachelor in Computer Engineering Tribhuvan University, Nepal
• Relevant Courses: Data Structure Algorithms, DBMS, Operating Systems, Web Development

PROJECTS

Food App — Restaurant Ordering System UI/UX *Aug, 2025 - Oct, 2025*

- Designed a complete restaurant food-ordering experience in Figma, covering menu browsing, cart, checkout, and order-tracking screens.
- Built a scalable design system (color palette, typography, and reusable components) to keep the UI visually consistent across every screen.
- Mapped user flows for first-time and returning customers to reduce clicks-to-order and minimize decision friction.
- Applied food-photography-led visual hierarchy to make menu items scannable and appetizing at a glance.

Guff App — Social Media Platform UI/UX *Nov, 2025 - Dec, 2025*

- Designed the end-to-end interface for a full-scale social media platform in Figma, including login, feed, discover, notifications, profile, and inbox screens.
- Designed a clean distraction-free feed, intuitive notification and inbox system for real-time interactions, prioritizing clarity and fast recognition of new activity.
- Built a consistent component library and visual language across every screen for a cohesive end-to-end experience.

MERN Stack Web Application — Blogpost Platform *Jan, 2026 - Feb, 2026*

- Designed and developed a full-stack blogging platform with a focus on a clean writing and reading experience.
- Designed CRUD-driven interface flows for creating, editing, updating, and deleting posts with minimal friction.
- Designed REST APIs and integrated authentication to support secure, personalized user sessions.
- Built a fully responsive frontend and managed backend data flow end-to-end.

Controller Poster *Jun, 2025*

- Designed a gaming controller poster with a bold visual hierarchy that draws the eye straight to the product.
- Balanced typography, composition, and color grading to give the piece a polished, professional finish.

SKILLS

Design Tools: Figma, Adobe Illustrator, Sketch

Web Technologies: HTML, CSS, JavaScript

Frameworks: React.js, Node.js, Express.js

Tools: Git, GitHub, VS Code, MongoDB
